

To Whom It May ConcernPlease to not cut out my Traffic & Weather reports from X-M Radio. I have used them a number of times when my local channels we not carring local weather & traffic (they only give that info during extreme weather or during rush hour) or when all I am getting are commericals. XM Radio's traffic info has helped me when I am traveling because I have avoided many accident scenes and have been alerted to what is going on in Houston. It would be a different story if there was a station that carried Traffic/Weather 24-7 but there isn't. You have to tune in when they want you to tune in to get this information. Sitting in a line that is not moving get very frustrating especially when it can be avoided. Since there is no radio station that gives this service all of the time I do not feel X.M. radio is stepping on "Local Toes."

Sincerely

Noelene Clark
